Experience

Apple

AppleCare Advisor

Atlanta, Georgia
March 2019-Current

General Assembly

Web Development Immersive

Atlanta, Georgia
August 2018-December 2018

- Built several front-end projects using React and vanilla JavaScript, HTML, CSS
- Implemented a RESTful API for a non-profit client to build and deploy a full stack React application
- Utilized Node.js, Express, MongoDB, Python, and PostgreSQL on the back end
- Developed a portfolio of individually and collaboratively focused in-class projects
- Utilized Git for project version control, Netlify and Heroku for deployment

Georgia State University, Atlanta, Georgia

January 2017-Expected May 2020

General Assembly/ Per Scholas Atlanta, Atlanta, GA

August 2018-December 2018

Year Up Atlanta, Atlanta, Georgia

March 2012-January 2013

Projects

SlaveFree Today

- Created a Full Stack Application for a non-profit organization, SlaveFree Today
- Built with Django, Python, React and PostgreSQL. Used AJAX and RESTful API for user authentication.

Swoosh

- Collaborated with a small development team to bring in statistical data for NBA players
- Implemented a fully functional API, using React, Bootstrap, and JavaScript, and FantasyData API

The Tea Tree

- Designed and created a unique and modern app, built for tea lovers.
- Refactoring to implement React front end to replace Handlebars to increase performance on a Node.js and Express app
